In an effort to support students struggling with homework Scottsdale Education Center developed a homework help and support program for students grades 5 – 12.

As we know missing homework assignments have a negative impact on student grades. Parents often struggle with ways to monitor homework or provide help to students in need of help with homework.

This homework help program is geared towards students who need to improve homework skills in a safe, directed haven where they can complete assignments. After completing our Study Skills Program, many students continue with regularly scheduled weekly homework support. Within the homework support program, we will check a student's grades and homework each session and send weekly reports to parents. In other words, we just taught your student how to fish, and now we are going to make sure they are fishing. It takes time to instill great study habits such that they are ingrained in a student's daily routine.
